

The Online Registration Form - An Overview

Last Modified on 01/15/2024 11:04 pm EST

The Online Registration Form is for use by **NEW** customers to create an account, provide family data, enroll in classes, agree to policies, and provide payment information. You control what options are available for online registration/enrollment. This form is for online use; for example: on your website, your Facebook page, or in an email blast as a link. The Online Registration Form is responsive, which means it is mobile-friendly for use on tablets and cell phones.

We recommend downloading, printing, and reviewing the [Online Registration Form - Checklist for a Successful Rollout](#).

What is the Online Registration Form?

The Online Registration form, customized by you, captures all necessary "new customer" information for a successful online registration. The one-page form can accommodate multiple students and multiple class selections on one submittal. It includes your legal policies and payment requirements and handles automatic email notifications.

The Online Registration Form can allow enrollment into specific classes and can also post Registration and/or Tuition fees if desired. Within seconds of being submitted, an email notification is sent to your organization and your customer with the registration details.

Online Registration provides convenience for your new customers to register/enroll via your website at any time, day or night, and because your customers are completing the registration process themselves, your staff is free to carry out other tasks.

The Related Articles (bottom of the page) walk you through setting up (customizing) your Online Registration Form, linking it to your website, tracking registrations, and more.

Do not put a live link to your Online Registration Form on your website until you have fully set up the form and tested it, as shown in the Set Up pages in this section.
