

Manage Classes in the Staff Portal - The Main Page

Last Modified on 07/04/2023 11:47 pm EDT

When staff logs in to their Staff Portals, they are taken to the **News** tab. In addition, staff can go to the **Manage Classes** tab to do the following:

- **Take attendance**
- **Work with skills/levels**
- **Create/send emails**
- **View/manage resources**

On the main page of the **Manage Classes** tab, there are several **Class Filters** available to allow staff to drill down to specific classes, including Date, Time, Cat1, Session, Room, Attendance Status (Completed or Not Completed), and Instructor.

Use the blue **Show Empty Classes** toggle to remove classes with no enrollment from the class list.

The screenshot displays the 'Manage Classes' interface. At the top, there are navigation tabs: 'Manage Classes', 'News', 'My Schedule', 'My Time Card', and 'Manage Classes'. Below the tabs is a 'Class Filters' section with fields for Date (07/04/2023), Time, Cat1, Cat2, Room, Session, and Attendance Status. A 'Go' button and a 'Reset' button are located below the filters. A yellow callout box points to the filter fields with the text: 'Use the Class Filters in this section to control which classes are displayed below.' To the right of the filters is a 'Show All of Today's Classes' checkbox. Below the filters, the date 'Tue, Jul 4 2023' is displayed. On the right side, there is a '2 Classes' indicator and a 'Show Empty Classes' toggle switch. Below this is a table with columns: Times, Class, Room, Enroll, Makeups, Storage, and Actions. The table contains two rows of class information. The first row is for 'Tumbling Beginner - Tues 6pm' with a yellow checkmark in the 'Attendance' column. A yellow callout box points to this checkmark with the text: 'Attendance for this class has not been taken.' The second row is for 'Tumbling Intermediate - Tues 7pm' with a green checkmark in the 'Attendance' column. The 'Actions' column for each row contains buttons for 'Attendance', 'Email', 'Lesson Plans', and 'Resources'.

The status of the attendance for a class is indicated by a checkmark:

- When no students in the class have been marked either present or absent, there will be **no checkmark** next to the class.
- When all students have been marked present or absent, a **green checkmark** indicates that attendance is complete.
- If you allow partial attendance, where staff can mark some students present/absent and save the changes to complete at a later time, a **yellow checkmark** will indicate that attendance for the class has been partially taken. See [Settings for Staff Portal Attendance](#) to learn more.

Additional class information is available by clicking the arrow (v) next to the class name. To collapse/hide that information, click the arrow (v) again.

The classes that are available to your staff when they are logged into the Staff Portal are determined by the settings in the Manage Classes Tab section of the Portal Settings tab in their individual Staff record. For an explanation of these settings, refer to [Settings for Staff Portal Attendance](#).

Action Buttons

Email	The Email button opens a window where an email can be composed. All enrolled students appear with a checkbox allowing staff to select which students to include in the email. The message is sent to all contacts in the student's family record in your database. A copy of the email is retained in the <i>Family</i> record, on the <i>Misc</i> tab, for 365 days.
Attendance	When ready to take attendance , staff will select the Attendance button.
Skills/Levels	Staff will select the Skills/Levels button to update skills if the class has skills assigned to it.
Resources	If a resource has been added to the <i>Class</i> record and assigned to display in the Staff Portal, select the Resources button to open the resource. In addition, when a staff member is given access to manage resources in the Staff Portal, they can add, edit, and delete resources for a class.
Virtual Classes	If a virtual class link was added to a <i>Class</i> record, it will display in this section. Click the Virtual Class button to open the video.
