Last Modified on 02/24/2022 7:36 am EST

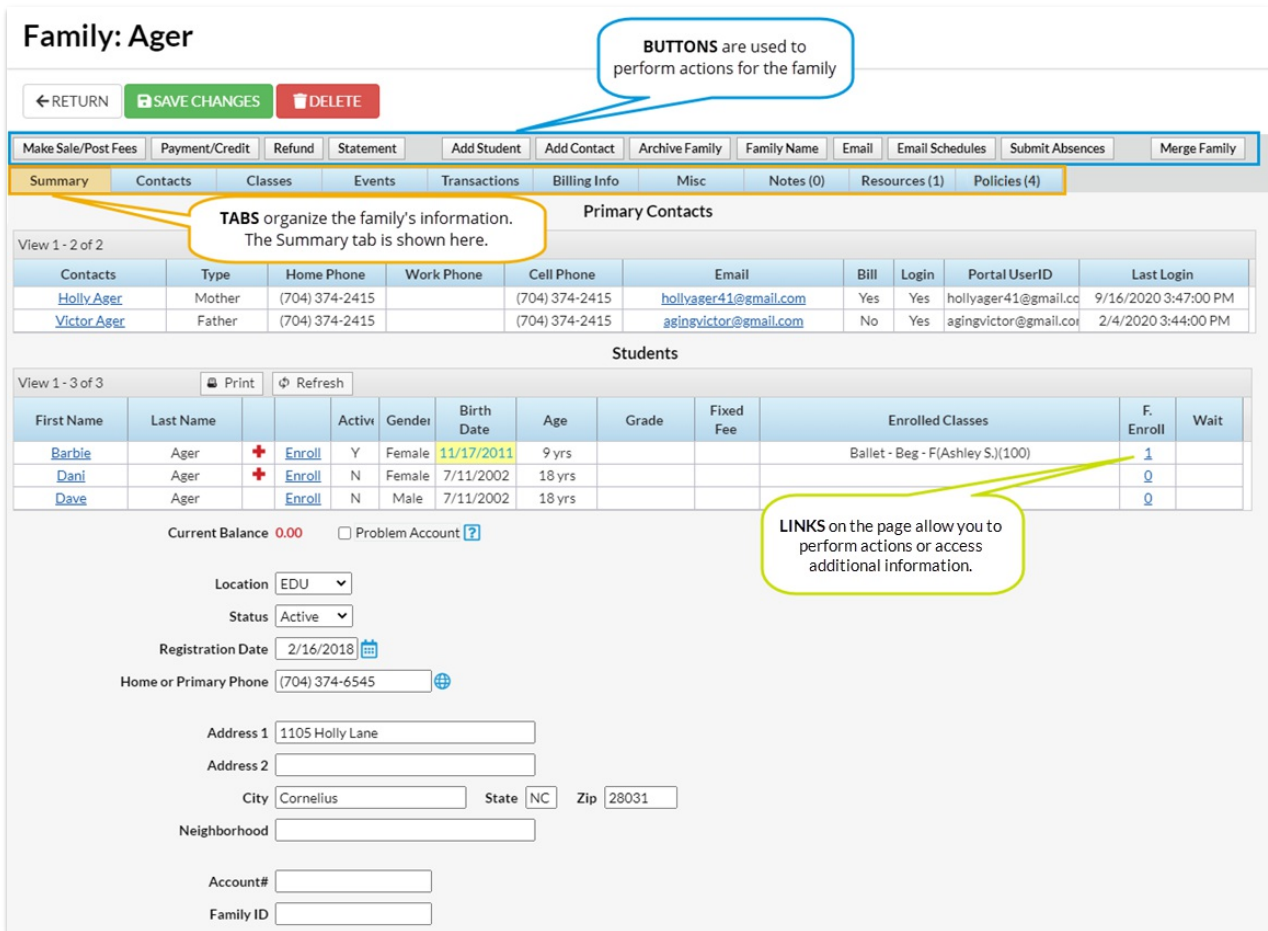

The Family record provides a centralized area to keep all information related to a specific family. It's like a file cabinet, it stores and organizes important information.

You can access a Family record from the following locations in Jackrabbit:

- *Families (menu)* > *All Families* and click on a family name to open the record.
- *Families (menu)* > *All Families* > row menu  > *View/Edit* to open the record.
- Use the global search at the top of each page to find a family.

Refer to [Work with All Families - View, Search, and Take Action](#) for more information on the *All Families* grid.

In the Family record, the information is grouped and organized on different **tabs**. **Buttons** allow you to perform an action for the family, for example, post a fee, and many links are provided throughout the record for convenient access to additional relevant information. Other links can be used to do things like enrolling a student.
