

Active vs Inactive Families

Last Modified on 02/13/2023 12:50 pm EST

A family is considered **Active** when it has at least one student enrolled in a class that has not been **archived**. The class start date does not affect this. When a student has an enrollment date in the future, even when the class has already started, the family is considered inactive until the future enrollment date occurs and the student actually starts the class.

The family status will remain active until the class is completed and has been archived. This is automatic and cannot be changed.

Family: Ager
