

# Delete a Student

Last Modified on 06/02/2022 7:59 am EDT

A student cannot be deleted from a family if they are enrolled in a class. In order to delete a student, the student must first be **dropped** from all current classes.

Once the student has been dropped from their classes, use the **Delete** button in the *Student* record to remove the student's record from the *Family* record, and from Jackrabbit completely.

## Student: Barbie Ager

Family: [Ager](#): First Name  Middle Initial  Last Name

*Deleting a student will delete their enrollment history. This will affect historical enrollment reporting. If the enrollment info is needed after the delete, there is a service fee to restore it.*
