

Online Registration Form - Field Options / Labels

Last Modified on 06/28/2022 10:42 am EDT

The essential settings for your Online Registration form are covered in our Help article [Online Registration Form: Settings](#). When you are ready to dig a little deeper have a look through these advanced settings to further customize your form.

On your Online Registration form, you have the ability to re-label most of the text box labels and decide which fields are hidden. You can also specify if an answer is required or optional.

1. Go to the **Gear** (icon) > **Settings** > **Online Registration** > **Field Options/Labels** (left menu) and you will see this screen (only the top part is shown here due to the length of the page).

Registration Form Field Settings
This screen allows you to customize the online registration form. You can re-label most fields, make them required or hide them. The labels will also appear in the Quick Registration, Parent Portal and Event Registration.

Preview Registration Form

Click to preview the Registration Form.

Decide which fields should be *Hidden, Optional, or Required.*

Use **Registration Form Label** to rename a field on your form. This does not change the field name in Jackrabbit, it is what your families will see on your registration form.

	Field Options	Registration Form Label
Referral Information		
How Did You Hear About Us	Required	
Referral Name	Optional	
Family Information		
Family Information Header		Family Information
Family/Account Name	Required	Family
Home Address	Required	
City	Required	
State	Required	State
Zip	Required	Zip
Home or Primary Phone	Required	
Emergency Info	Optional	Emergency Contact Info (Not Contact #)
Health Insurance	Hidden	Health Insurance Carrier
ePayment Schedule	Optional	e-Payment Schedule
Membership Type	Hidden	Membership Type

2. Re-label any fields you'd like to. This will change the field labels in the Online Registration form,

Quick Registration, Parent Portal, and Event Registration when applicable.

- For example, perhaps you want to relabel the "Student Transportation" field to "How is the child being picked up?".
 - The custom labels you edit here only change what is shown to the parent. It does NOT change the field label internally in Jackrabbit.
 - Decide if you want each field to be Hidden (so that it doesn't show at all), Optional (it shows but the parent can leave it blank), or Required (parent must provide a response).
3. Customize the **Drop-down lists** (e.g. Contact Type, Student Gender, T-Shirt Size, etc.) by going to the *Gear (icon) > Settings > General > Drop-down Lists (left menu)*.
4. Custom Family **User-defined fields** (5 per family, and 5 per student) can also appear on your Online Registration form, Quick Registration, Parent Portal, and Event Registration when applicable. These are set up under the *Gear (icon) > Settings > General > User-defined Fields*.
- They can be used to gather specific information that your organization deems necessary, such as coupon redemption information, costume sizes, past skill achievement, special requests, or any other data or short Q&A that you would like to capture during registration.
 - You can make these fields hidden, optional, or required. Values entered by the customer are recorded and included in Email confirmations.
 - Values entered on a Family User-defined field will be saved/shown on the Family Misc tab. Values entered on a Student User-defined field will be saved/shown on the Student Misc tab. The responses also show up on several searches and reports throughout Jackrabbit.

Registration form labels that are customized apply to the Online Registration form, Quick Registration, Parent Portal, and Event Registration.
