Filter (Group) Your Online Class Listing Tables

Filtering your **Online Class Listing Tables** to show only a specific group or sub-group of classes is the recommended first step when you are customizing your tables.

Starting with the basic Online Class Listing Table, filtering allows you to break the table up into several smaller tables that are organized together by a common Category code, Session, Location, etc. For example, create one table for Ballet classes and a separate table for HipHop classes.

To filter Online Class Listing Tables, parameters are added to the **basic JavaScript code and URL (link**). Well, that certainly sounds very techie 🫣, doesn't it? It sounds worse than it is, we promise!

Let's step through it here and look at some examples with the code and links. If you prefer a quicker study, check out the Speed Learning section in **A Cheat Sheet for Customizing Your Online Class Listing Tables**.

For a more thorough explanation of how parameters work (with a piece of cake🍰), check out **Understanding How to Customize Your Online Class Listing Tables**
