Seamless Integration with Jackrabbit's Parent Portal

Jackrabbit Plus seamlessly integrates the Parent Portal with a mobile app, allowing your customers to perform tasks quickly, such as:

- View available classes & events

- Enroll students with a few clicks
- Pay their bill (if you are connected with one of Jackrabbit's ePayment providers)
- Manage auto-pay
- Manage student information and view student skills, absences, etc.
- Scan a QR code through the app for attendance tracking

For Spot TV subscribers:

- Parents can view their child's class in real-time directly in the Parent Portal if your organization subscribes to the [Spot TV](#) online streaming service.

Customized Branded App

It's your brand, and we think your mobile app should represent it well. You'll have a custom app store listing, branded app icons, launch pages, and your color scheme applied throughout.

Your custom-branded mobile app will be available for download at Google Play for Android devices and the Apple App Store for iOS devices.

In addition, when parents log in to the Parent Portal, they will see a call to take action **Download Our App Now!**, with the download links at the top of the screen. If they are already logged in to the Parent Portal, the links below are under the hamburger menu.

Unlimited App Custom Content & Additional Features

Create as much content as you want at any time. Changes can be made for future use and published immediately when ready.

In addition to creating custom content, your mobile app will keep you connected to families, provide business insights, and help achieve your business goals with these included features:

- **Push notifications** - Allow mass "texts" to be sent to customers who have agreed to push notifications. Send targeted push notifications to select customers just as you do for email or text!
- **Punch Cards and e-Gift Cards** - Increase revenue streams by selling [Punch Cards](#) and [e-Gift Cards](#) through the app.
- **Real-time 24x7 mobile app statistics** - Use a number of tools to track how your app is being used, push notification effectiveness, and in-app enrollments.
- **Social Media integration** - Put all of your media in one place for quick & easy access.
- **Gymnastics Stat Tracker** - Team kids can track their event scores and view progress as a graph.
- **Google Calendar Integration** - Allows app users to see your schedule, get native map directions to events, and subscribe to your calendars.
- **Group Chat** - Two-way text messaging is supported in the app. This includes sharing photos, videos, and PDF documents with no size limitations.

Customer Support Information

The [Mobile Inventor Help Center](#) provides you with everything you need to get started, create and manage your content, and includes recommendations to promote the use of the app for your customers.

Video Tutorials

App Basics

These quick, must-watch tutorials are designed to help you make the most of your mobile app and unlock its full potential for your business. They're easy to follow and will set you up for success!

Customize Your App

Use Jackrabbit Plus to craft a personalized, branded app for your business. Watch this video to get a quick and easy overview of how to kickstart your new app.

[Watch the tutorial](#)

App Login Settings

To gain insights from your Jackrabbit Plus Mobile App, monitor statistics like unique users and app engagement. For detailed tracking, require users to log in by adjusting settings in Mobile Inventor, which allows you to manage access, track usage, and send targeted notifications.

[Watch the tutorial](#)

Password Protected Pages

Enhance your mobile app's security by adding password protection to content. This will restrict access to recitals, competitive team details, calendars, and more!

[Watch the tutorial](#)

Your App Menu

Follow these simple steps to customize your mobile app menu effortlessly. You can easily arrange and adjust items to fit your needs and preferences.

Frequently Asked Questions

Q. *Where can I see an ePayment that was made through the Jackrabbit Plus mobile app?*

A. You can see a payment that was made through the Jackrabbit Plus mobile app in the *Family record > Transactions tab > User* (last column). The *User* is listed as *Portal-* (with the contact email address).

To make an ePayment using the Jackrabbit Plus mobile app:

1. Log in to the mobile app.
2. Click *My Account*. The current balance is shown.
3. Click the *Pay Now* button and walk through the *Make a Payment* workflow.

Q. *What is this Family record, **ZZMobileInventorRequired**? I never added it.*

A. When you sign up for Jackrabbit Plus we added a Family record for **ZZMobileInventorRequired** to your organization's account. This is added to comply with Google and Apple's mobile app compliance regulations for verification. The Family record has a status set to inactive, does not count toward your Jackrabbit monthly billing, and cannot be edited, deleted, or archived.

This message appears on the Family record Summary tab.

Q. *Does Jackrabbit Plus support in-app viewing with **Spot TV**?*

A. Yes! If your organization has an account with Spot TV, parents will be able to view the live-stream classes and watch their children in real time.

Q. *Why was the opt-out group functionality removed from the app and the app dashboard?*

A. With opt-out groups, anyone using the app was subscribed to that group and could opt-out of it. Now, anyone wanting to be part of a group in the app must opt in by accepting a group invite or by subscribing to that group in the app. Note: If you were previously (before May 2024) sending push

notifications to one or more opt-out groups, we recommend that you skip the group selection and send the notification to anyone using the app.
