

Swim - Client Website Examples

Last Modified on 05/15/2024 2:31 pm EDT

Swim facilities face unique challenges in presenting online registration. Traditionally, most swim schools want to limit the parents' ability to choose and enroll in a specific level without the staff first evaluating the child. Also, classes are usually 1-4 students and many times the level of the class isn't defined until the first child is enrolled. Jackrabbit Swim offers several options to meet these needs!

Little Flippers Swim has two locations and groups classes into tables using Category 1, Category 2, and Session.

- Parent Portal login button is located at the top center of the home page. New customers can also create an account by clicking the button beside it.
- From the navigation menu, under either the Natick or Winchester location, choose a session and then the appropriate level/age. Click any bar to "open" the class listing table displaying those classes.

Stony Creek Swim Center has multiple locations and uses Category 1 to create grouped tables.

- Parent Portal is located on their green navigation bar.
- Access classes by using the blue "Register Online" box or by making selections under "Swimming Lessons" in the white navigation bar.
- Each level of classes has a separate page with a description of each and a class listings table underneath.

The Swim Lesson People website was designed by one of our recommended developers, Grant Kantosis at HappyClass.com.

- Parent Portal "Login" is found in the top navigation bar.
- From the "Swim Lessons" tab, select a program, then answer a question about the child's current ability.
- Once you choose a skill, you are shown a Class Listing Table with days, times, remaining openings, and tuition.

Water Sprites Swim School uses the class listings tables grouped by Category 2.

- Parent Portal is a large blue button on the home page.
 - Also on the home page is a large blue "Register Now" button, which allows new families to create an account online.
 - Click the large orange "Class Schedule" button, and you're taken to their Class Schedule page which shows multiple tables grouped by Category 2.
-
