Text Messaging Settings

Last Modified on 05/09/2023 9:35 am EDT

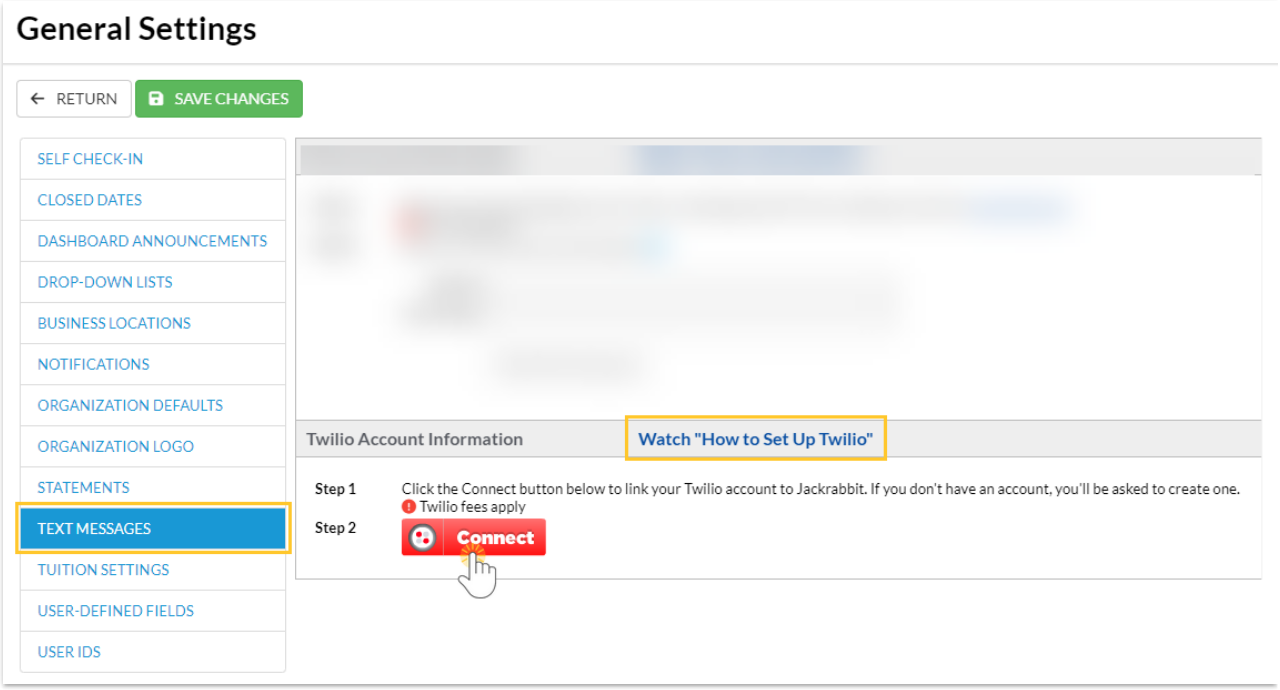
Permissions control the ability of your Users to see certain data and take specific actions. Before moving forward, review **User Permissions for Text Messaging**.

Jackrabbit has partnered with Twilio (**www.twilio.com**), a text messaging provider, to offer you the ability to send text messages to your families using Jackrabbit.

Refer to **Get Set Up for Text Messaging with Twilio** for step-by-step procedures to set up Twilio to use with Jackrabbit.

Go to the *Gear (icon) > Settings > General > Text Messages (left menu)* to start the setup process for text messaging. Once it's set up, you can access the Twilio account from the same location under *General Settings*.

We recommend you click on the link and watch the video on this page, **Watch "How to Set Up Twilio"** for additional information.



For additional text messaging information, including suggested text messaging guidelines, refer to **Texting in Jackrabbit - An Overview**.
