User Permissions Required for the Store

Several User Permissions control the ability to access features related to the **store**. The first six permissions automatically default to *Yes* for all Users. The *View Item Cost in List Items* permission automatically defaults to *No*.

User Permissions play a crucial role in protecting your data by controlling who can access, modify, or perform specific actions in your system. Review **Protect Your Account - User Permission Guidelines** for more information.

To adjust a User's permissions, go to the **Gear** icon > **Settings** > **Users & Permissions** > **User IDs** (click on a UserID) > **User Permissions** (left menu) to set the permissions. *Note: If a User is logged in when changes are made to their permissions, they'll have to log out and back in for the changes to take effect.*

Permissions Related to the Store

Category	User Permissions	Enables access to
