Jackrabbit Training System (JTS)

JTS is intended for any business that wants to offer its staff self-paced training to master the core features of Jackrabbit.

Each lesson includes a quiz that sends results to an assigned email address. Users learn on a designated Jackrabbit system, separate from your own, to allow trainees to practice while working through the lessons without affecting your data. JTS offers all of the following:

- Onboard new staff with lessons organized by User Role to cover Jackrabbit features important to their job function.
- Provide learning and development opportunities to existing staff.
- Strengthen your own understanding of all things Jackrabbit.

▶ Click here to take a look at the JTS today!

ⓘ

See the Supervisor Instructions article for information to give your trainee before they hop into the JTS.
