Discounts Based on Total Hours

Last Modified on 02/18/2020 2:36 pm EST

When posting tuition fees for classes with the **Billing Method - By Total Hours**, the tuition fees are calculated using the **Fee Schedule**. The Fee Schedule defines how much is charged for each increment of time spent in class and allows you to build in a discount for multiple hours of class time, aka multiple classes.

Example:

- A student who takes a one hour class is charged a tuition fee of $60

- A student who takes 2 one hour classes (2 hours) is charged tuition fees of $100

- A student who takes 3 one hour classes (3 hours) is charged tuition fees of $150

The hours discount given for two hours is $20; the student was charged only $100 for 2 hours vs $120 ($60 for one hour x 2).

The hours discount given for three hours is $30; the student was charged only $150 for 3 hours vs $180 ($60 for one hour x 3).
