

Add Access to Online Training in the Parent Portal

Last Modified on 12/05/2023 2:38 pm EST

Take things to the next level and enrich your students' experience through online learning with virtual classes or shared video tutorials! Use a virtual class link or add a resource to a Class record and the information can be shared through the Parent Portal.

- ★ Share online training materials with the students currently enrolled in the class, or scheduled to be in the class for a makeup.
- ★ Use a URL link you create using a video-sharing site like [YouTube](#) or [Vimeo](#).
- ★ Create a virtual class with a video conferencing service like [Zoom](#) or [Google Hangouts](#) and share it with your class.

Be sure to consider any possible tax or insurance implications related to offering online classes or video instruction. Update your [Policy Agreements](#) as needed to include policies regarding online training.
