

Class Makeup Group Size Limit

How many 'extra' spots do you allow for makeups? If you do not want makeups to exceed the Class Max Size, set this to '0'.

Example 1: Class Max Size is 8, 7 students are enrolled and there are no scheduled absences today.

If *Class Makeup Group Size Limit* = 0 only 1 makeup can be scheduled (1 opening in the class).

If *Class Makeup Group Size Limit* = 1, 2 makeups can be scheduled (1 opening in the class plus 1 makeup limit)

Example 2: Same Class information as above, but there is 1 scheduled absence for today.

If *Class Makeup Group Size Limit* = 0 2 makeups can be scheduled today (1 opening in the class plus 1 absence).

If *Class Makeup Group Size Limit* = 1, 3 makeups can be scheduled today (1 opening in the class, plus 1 absence, plus 1 makeup limit)
