What is a Checkup Call?

A Checkup Call, also referred to as a system review, is a 30-minute Zoom (video conferencing) call with a Jackrabbit Support Representative. The call is accompanied by a screen share from within your system and is customized to fit your needs. You can ask questions, and we will demonstrate the answer for you live!

What will you gain from this call?

- An in-depth review of your system to ensure you are getting the most from the software.
- Guidance on powerful features that may be being overlooked.
- A review of your daily and monthly processes with Jackrabbit Best Practice recommendations.

Take advantage of this opportunity to help you improve your use of Jackrabbit and maximize your potential!

From System Consultants and Webinars to Onsite Training, Jackrabbit has a training option that will fit your learning style! Learn more about Staff Training Options.
