

# Yearly Summary - Business Intelligence Dashboard

Last Modified on 02/09/2023 2:16 pm EST

Take a look at your organization's yearly enrollment, student, and retention trends using the [Business Intelligence Dashboard - Yearly Summary](#) page. The data presented helps you keep track of your yearly student count and enrollments. This will provide you with business insights at a glance rolled up by year.

In addition, tracking the retention rate is important because the cost of keeping an existing student enrolled is much less than the cost to acquire new students.

The data is presented in tiles or sections, and multiple tiles make up the [Yearly Summary](#) dashboard page.

- ✓ [Tile Icons](#)
- ✓ [Formula Used](#)
- ✓ [Take Action](#)

Your Business Intelligence Dashboard is powered by Microsoft Power BI. There are many filtering options and different views for the data in your dashboard. We recommend you visit the [Microsoft Power BI Learning Center](#) to see additional options to filter and visualize your data.
