

Print Your Activity Calendar

Last Modified on 05/15/2025 10:16 am EDT

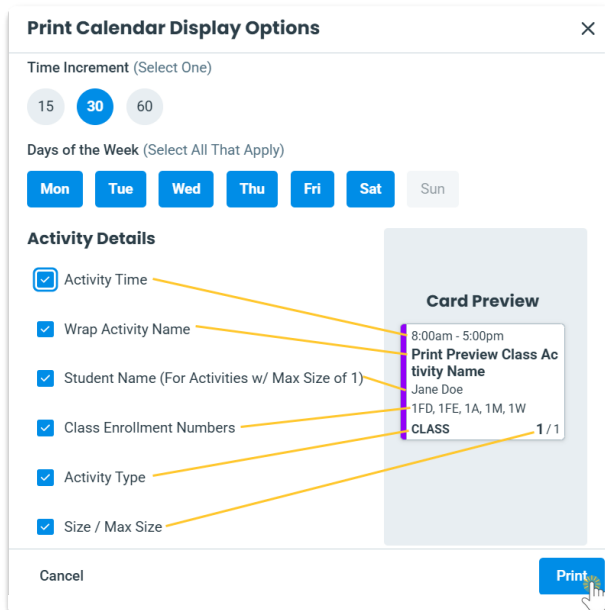

Use advanced options to print your **Activity Calendar** in Weekly, Daily, Room, and Instructor stacked views. Print options may vary slightly depending on the selected calendar view. You can only print the Agenda view with the options available in your printer's settings. Printing is not available for the Side-by-Side card density.

Here, we will walk through the steps to print the Weekly view.

1. Use the **Calendar** link in your Jackrabbit system's header to access the Activity Calendar, which will open in a new tab.

2. Choose the calendar view you'd like to print and then use the **Switch Card Density** icon  to select either of the **Stacked** options (*Comfortable* or *Compact*).
3. In the expanded header of the Activity Calendar, click the **Print Calendar** icon  to open the Print Calendar Display Options window.
Note: If you are working in the collapsed header, you'll select the **More Options** icon  and choose **Print Calendar**.
4. Select your preferred **Time Increment** and **Days of the Week** (for Weekly view only) to customize your print layout. Use the **Card Preview** to see how your chosen Activity Details will appear in the activity cards.

5. When you are happy with your preview, click **Print** to send the calendar to your printer, where you can adjust printer-specific settings before printing:

- To print your Activity Calendar in color, select the color printing option in the basic settings. Additionally, enable the option to print backgrounds - labeled as *Print backgrounds* or *Background graphics* - in the More Settings or Additional Settings section of the print dialog box.
 - To print on fewer pages, navigate to the More Settings or Additional Settings section of the print dialog box and set the *Scale* to custom and reduce the scale value.
