Assign Policy Groups to Appointments

Depending on your organization and the **Appointments** you offer, you may need to assign specific **Policy Groups** for private lessons, evaluations, room rentals, and more. This determines which policies families must agree to when booking an appointment.

Changes to an Appointment Type, such as assigning Policy Groups, apply only to new bookings. Previously booked appointments are not affected. You can also assign Policy Groups when creating a new Appointment Type. Learn more in our article **Create an Appointment Type**.

To assign Policy Groups to an existing Appointment Type:

1. Go to the **Appointments** menu > **Appointment Type**.
2. Select **Edit** next to the Appointment Type you want to update.

3. Go to the **Step 4 Additional Information** tab, and select the checkbox next to each Policy Group you want to assign.

4. Click **Save and Publish**.
5. In the pop-up window, click **Yes, Update** to confirm the changes apply to future bookings only.
