

# Use the All Students grid to see how long students have been enrolled [Share](#)

Last Modified on 10/06/2025 8:22 pm EDT

## Issue/Question

---

Is there a report I can run that lists all current students and how long they have been enrolled?

## Environment

---

Jackrabbit application

## Resolution

---

Use the **All Students** grid to find currently active students and [show additional columns of information](#) to display the student's **Date Created** (when the student record was created in Jackrabbit) and **Date Started** (date of first enrollment\*). Then, sort the data to see which students have been enrolled the longest.

*\*This field is editable and may have been changed from the original date.*
